

Real-Time Data Management for Avaya Communication

Taking Your Business to the Next Level!

Avaya Communication Interface

NeXorce collects data from multiple socket connections and/or ODBC databases and displays key data to display devices. Adding VectraView™ provides dynamic graphics as well as live video to large screen digital signs such as Plasma Screens.

Spectrum Corporation has a powerful software solution that empowers your workforce to make better decisions using real-time information. NeXorce™ collects, combines, formats and distributes real-time and historical data from multiple Avaya CMS Socket Connections and other ODBC Databases. Quickly deliver metrics, critical messages or a variety of Split Skill Data and Direct Agent items to plasma

screens, wallboards, desktop screen-pops, email, XML and mobile devices.

Add Value with Real-Time Solutions

- Web-based Service Administration
- Multiple Data Sources
- Dependable / Scalable as Business Grows
- Advanced Security Features
- XorceView™ a Screen-pop/Dashboard
- Digital Signage with VectraView™ Software

NeXorce is an effective tool in managing resources and monitoring performance. Communicate critical information and relevant data to your workforce and achieve business goals that affect the bottom line.
